

Fundamentals of Process Safety Management training in South Africa

IChemE brings its Fundamentals of Process Safety Management training course back to Boksburg, South Africa next month. A limited number of places are still available.

Fundamentals of Process Safety Management (SAIChE accredited)

7-11 November

Our flagship process safety course has been revised and updated for 2016. It features new case studies, latest information and current best practice. This intensive course covers the fundamentals of process safety and will provide you with an understanding of the key principles of process safety and its management. Delegates who successfully complete the end of course assessment will receive an IChemE pass certificate in the Fundamentals of Process Safety Management.

[Find out more and register >>](#)

Core course topics include:

- Hazard and risk
- Chemical reactions
- Design safety
- Asset integrity
- Management of change
- Human factors
- Safety culture

The programme also includes an end-of-course examination. Delegates who pass the examination will receive an IChemE pass certificate in the Fundamentals of Process Safety Management.

Discounts are available to companies booking more than one place at the same time. This course can also be run in-house at a time and location convenient for your company. Email courses@icheme.org for more information.

Kind regards
